

*Since this is a process or cycle,  
it is OK to go back and redo a  
step in order to move forward!*

1.) Develop a  
Research  
Question

2.) Pre-search to see  
if there are sources  
available to answer  
your question. If not,  
revise!

3.) Evaluate the  
sources.

4.) Take notes  
and cite your  
sources.

5.) Organize the  
notes into a final  
product

6.) Evaluate what  
you did and  
learned.

# The Research Process
